

ICD-Phecode data
N = 351,843

Check that sex-specific phecodes
matched EHR recorded sex

n = 4,124

After sex-concordance
check
N = 347,719

Threshold EHR to at least 14
days prior to index test

n = 40,266

*This step also excluded
individuals with missing/infinite
age at index test*

After EHR time-
thresholding
N = 307,453

Limit to people who are adults
(>18) at the index test

n = 47,558

After limiting to adults
N = 259,895

Remove individuals with age ≤ 0

n = 2

Analytic tested cohort
N = 259,893
