

ICD-Phecode data
N = 405,197

Check that sex-specific phecodes
matched EHR recorded sex

n = 56,061

After sex-concordance
check
N = 349,136

Threshold EHR to at least 14
days prior to index test

n = 40,782

*This step also excluded
individuals with missing/infinite
age at index test*

After EHR time-
thresholding
N = 308,354

Limit to people who are adults
(>18) at the index test

n = 47,594

After limiting to adults
N = 260,760

Remove individuals with age ≤ 0

n = 3

Analytic tested cohort
N = 260,757
